Tercius sermo messis

Tempestatis et quiescens cicada cum vidisset formi-
cam multo labore granum suis orrimis attrahentem,
compaciens ei dixit, et quid in tanto laboriosa
cum nunc refrigeratiua quiete et humectiua umbra
requiescere, cum non solum nuda cauis tepescente sustineas
Sed et penis et granum onere te occidis, nonne vides
quod in umbra vidi et nichilo requiescas in sufficien-
tibus nisi cantu refrigeratiuum cordis auxilium carpe
possis, Cui inquit rogo, donec messis transeat iterum
Cui mox impedit formica, formica respondit, Omnia
tempus habent et suis spaciis transeunt universa sub celo
Omnium abierunt sicut queque suo loco et tempore agenda sunt
vera et acquirenda, itaque si rei oportuno tempus negle-
ctum transierit, cum indiguerit postea minime recipit
eo quod hora debita ex natura non consuit, hic ergo uti
tu cum innumeris quidem summa opera et nobis, cum queque
vite alimenta accomoda illo tempore vigeles colligenda
quorum nunc beneficia dum licet a benignis, Tempus autem
colligendi nectus est messis, unde nunc providenciam la-
boribus congrego, Cum vero minime autem hieme
opulenta requiem habeo, Cum vero imprudenta futuri temporis
negligens instabili pretio, quiete nunc est in yemo

quo nunc delectaris quasi umbra transiens. Et quamvis
ardor feruens solis in estiuali tempore successerit, nichil co-
ngregata in messe. Nonne dixi in providencie gladio
vitam tuam et gaudium diligens peremisti. Et attende
queso, quanta in suis rebus vigilantia nobilis pro-

cessitatibus debitum spacium providencia distribuat alimentum

tore conducitur. Et sic providentur mutaciones temporum
in estiuum. Terra et terra in hyeme concipit que di-
gesta estatis medio futuri temporis providencie gignit.
Similiter ac consequenti anno semel suauiores palma
dactilos generat et vites liquorem dulcissimum pari
ordine sic distillant. Sic nimirum fontes qui non
semper scatuiunt uiuunt stellarum simul terram inuita
quadditate diuturna perfusi cernuntur, unde totus non
ordo providencie gubernatur. Quid igitur ea spreta
que contra vite tue commoda, facto que neglecto de preteritis
tuis gaudes. Ego enim ni fallor defectum plus tuo
re presumpto perdidi instans celi tempus rapidissimo ad
transitum et tum quod super et futurum possideo. Hiis

Vigalis munificencie graditate attende ad primarium liberalitatis fontem, vii bonitatis cuius testis est deus, quantu i realitate mundo tribuit, omnia omnis, quantu plenitudinis firmamento quod omnis stellas, et quantu in splendore, quam totu lucem. Nunquam aliquid munificentie tam magnie puritatis bonitatis superfluo vacuum. Sic etiam quod liberalitas agens perfecto corpori quantum potest tribuit. Sic liberalis unicuique vestra ipsa in superflu cuncta dedit. Sic largissima fons et gratia altius tota i seminarium plenitudo, semetipsam effundens. Vel igitur liberalitas superfluum non est tam, sed extremus non est magis, sed unguis, neque tum sed totum bonum quo dicto magis virtutis comulit etc.

Probum quod virtuosi liberalis dei est perpetuum

Sup i inclinati dambris sit locutus est extra, vel de tue manacois cessabit impetus quo tenabit influxus quos nisi latices dicit ille pater indignatus. Ut vere loquitur de mari quod flucta eius insaciabiliter recipit. Nec tamen poterit saciari. Nimirum tue liberalitatis nec cessabit influxus cum insaciabilis tue liberalitatis appetitus non enim maior est valitudo virtutis quam necessitatis defecto. Et propter sicut cupitati nulla satis est ita liberalitatis nullus est finis. Ut ille quod dicquo propter quod. Et quod tribuit liberalis Nove inclinacione virtutis preter boue dilectionis donat bene dilectis se totu communicat. Cum igitur liberalis inclinat propter agit nec vinquam existit ociosa. Unde propter liberalis pius liberalis liberalitatis est perfusus. Simile autem deus amor sine fine. Caritas autem nunquam adilectione excidit. A qui est amicus perpetue diligit. Sed quam condilectione largitur nunquam a dilectione cessitur nisi dilectio finiatur. Cum patet cum amor magis, sic nunquam desistit superfluus liberalis si autem desinit separatur

dicitur bis donat. Nescio bis qui voluntate et placidam rem
a[liquam] cito bis dat in voluntate etc. Bonum in voluntate ro-
datur. sed tamen de forte ope qui donare tardavit. Namque
ubi ad dandum facultas affuit etc. si intus fuit tarditas
et voluntas non fuit. Verum si dare diligeretur non tardaretur.
Neque cum aliud percipiat. magis liberalis intelligitur
cum hoc quod dare voluit noluit. porro si liberalis et
donator letificari videri decet. Eo quo intus magis gau-
det suscipitur nunquam tardavit. Attende queso quanto qui
impetu aqua de illi fontes statim veniunt funduntur tan-
to beneficium voluntarie. Et similis forma videtur in aqua
in tempore copiosa beneficium. quanto dat velocius tanto
liberalius. Et quanto liberalius tanto liberalius ac quanto li-

detur. Quibus auditis caligo disparuit etc.

De miseria iustorum

Cum boni ideo in diversa
oppressione langueant affliguntur
ut in malis delectantur sunt
si aliqui que diu egerunt de-
leantur, sicut non prosperitas
donatur. Cum contingit quod
boni et diuinos redundat
potentia per linea valitudine
corroborat et mali ac in
fine pena oppressione la-
borat. **De prosperitate malorum**
ac cum bona decent omnia
adeo quod concedunt ut bona
que dant vel per plus valeat
et per alia famem et fame
talia sicuti ignis crescunt
videtur potentia sublimatur quam
per papas ut illis quod mitte
quaerent sunt quod potest
eo ipse docet ut eis bona in
terra sunt et per eos
ut reprimat nec hi cupi-
tum voluntatem necat. Sanitas per
ludat ne ut nisi deterrorem
tendere (?) consistit. Sed deterrorem
fam... docet. **De miseria**
malorum quidam mali hic
corporali afflictione cum
dolore suspirant ut per
statim quod dura se adeo
fons morbus suppremat de-
tur quod mali dum

vivunt. Quidam boni aniib
moriuntur et quidam alii boni
diuturna vita ducunt, quidam
vero celerius obiunt

De longa vita malorum

et misterium quod in deo mali diu
vivunt permittuntur ut electi
per eos proficiant et alicui
corrigat ipsi nos per maiori
supplicio torqueant. Et boni
ad citius tollunt ne diuturnitas
hic ad usum attrahat. Quidam
sunt gaudijs inserti
et sic vita longa miseri
et illorum mente augeant
et plus per eorum exempla committi
quidam fame tedeat ad tor-
menta rapiuntur ut electi ad hunc
terribiles timore in terrent
et ab erroribus retrahant de
filius qui ad usum nos tangit

De infelicitate

ac quomodo
felicitati
sunt quibus hic pena temporalis
ut sperant permittuntur et ira
sua de perdita plebe sua
plorant ad dignitatem nos tangit
quod electi ut amica longeva
ligna vivunt. De felicitate
electorum sunt felices qui hic a suis
de peccatis arcentur et multos
aspera bis co arcet quod electi
ad regnum ut filij flagellis
erudiuntur ut dicitur quem flage-
llat omnes filius quod diligit
et recipit. Nolo enim te scire
quod reprobi confessi boni regni
parant cum a persecucione sunt
et numquam sunt supplicatur et

Habito ciclo solari et litteris dominicales ipsius sunt in veneran(dis) que per ciclum solarem currunt. Circa quod sciendum est septem scilicet G F E D C B A. Unde totus annus solaris habet septem litteras septem. Unde totus annina significat. Ita quod qualibet die erit una et post septimam ultima redit prima. Et ex aliis una erit dominicalis et relique feriales in ordine. Dominicalis datur omni anno variatur. Et ult(ra) quinquaginta duas septimanas. Una dies est superflua que designatur per A in fine kalendarii ponitur. Et quia in principio kalendarii etiam ponitur A ideo duo A fiunt et sic facit variationem littere dominicalis. Quinquennium autem annis dominicalis bis variatur et in illo anno erit duplex scilicet que bissextilis. Communis annus est ille qui continet trecentos sexaginta quinque dies sex horas cum duodecim minutis et illorum sunt tres in quibus solum semel variatur littera dominicalis. Bissextilis autem annus est ille qui continet trecentos sexaginta sex dies. Ita quolibet anno sex hore ultra dies sunt superflue que reservantur in tribus annis quibus quarto diem naturalem constituunt. Et ergo in quarto anno una dies interponitur sexto kalendas et die sequenti celebratur festum mathie

Nunc de festis mobilibus dicendum est. Dicitur autem mobile quia potest ascensum et descensum lunaris celebrari nullum tempus certum locum sibi in kalenda-
rio assignatum. Et illorum sunt sex. Quorum primum dicitur
septuagesima a septem et quinta decem eo quod septua-
ginta dies continet quos recolit sancta mater ecclesia ob-
in memoriam septuaginta annorum quibus filii Israel capti
fuerunt in Babilone in egipto, cuius festi initium capitur a domi-
nica qua tantum[illegible] cantatur alleluia et ibi deponitur cantus
letitie ut alleluia et gloria et tantum cantus tristicie sci-
licet propter tristiciam filiorum Israel in captivitate.
Et finitur in octava pasche qua cantatur quasi modo geniti
Et hec autem octava pasche cantatur alleluia eo quod fuit tempus
redemptionis et aliquando fuit in leticia. Tunc in festo
quasi modo geniti cantatur duo alleluia addictione quod filii
Israel quemadmodum fuerunt redempti a vinculis pharaonis.
¶ Secundum festum mobile dicitur quadragesima a quadra
quod est quatuor et quinta decem eo quod quadraginta dies
continet quos recolit ecclesia quando Moyses quadraginta
diebus ieiunavit et legem a deo suscepit. Etiam quia
Christus quadraginta diebus ieiunavit et dyaboli
vicit temptationes quia propter nos etiam quadraginta diebus
in ieiunio debemus penitere. Cuius festi initium capitur a dominica qua
tantum in [illegible] et extendit se usque ad festum pasche.
¶ Tertium festum mobile dicitur pascha. Unde pascha Greca, phase
ebraice, transitus latine dicitur, quia filii Israel transierunt
siccis pedibus mare rubrum et liberati fuerunt a captivitate
pharaonis. Et Christus transivit mare rubrum, id est semper
fundens sanguinem in humanitate moriendo et demor-
tuo resurgens humanum genus redimendo. Sic ergo nos
debemus a iugo dyaboli ad primas, deus quod [illegible] vincitur
et deletur vita activa. ¶ Quartum festum mobile dicitur
rogationum, scilicet quando Christus ascendit in celum, quod inchoatur
die dominico precedente festum ascensionis et dicitur a rogan-
do quia isto tempore orationibus, ieiuniis et processionibus Christum
rogare debemus ut defendat nos a morte sentencia et
ut conservet terre fructus. Dicitur autem rogationum in plurali quia

Mensis autem lunaris est spacium temporis in quo luna recedit a sole et iterum ad solem revertitur in tempus viginti quatuor et quadraginta quatuor minuta. Et continet viginti novem dies duodecim horas. In anno solari sunt duodecim menses quorum in communi anno lunari sunt duodecim et in embolismalis tredecim et sunt lunationes quibus spacium duodecim lunacionum in anno solari communi excedunt quinquaginta quatuor diebus

Ista inscripta thabula in [illegible] primo anno [illegible]
post [illegible] linea directe sequenti invenies ciclum solarem
deinde invenies litteras dominicales [illegible] anni [illegible]

[illegible] anni / deinde radices [illegible]
[illegible] et minuta illius anni [illegible]
Radices solis [illegible] gradus et minuta [illegible]
anni [illegible] radices lune [illegible] thabula [illegible]
[illegible] ad alti[illegible] regiones [illegible] est [illegible] civitas
Hamburgensis [illegible] aut aliarum regionum [illegible]
[illegible] aliqua regio [illegible] civitas distat ab oppido [illegible]
[illegible] miliaria theutunicalia [illegible]

aequalitatis radice lune pro subtrahendis / Exemplum autem tibi regio vel
civitas distat ab oppido Norbergensi per 6 miliaria versus ortum
[illegible] civitatibus [illegible] radice lune pro addendis
Si autem regio vel civitas distat [illegible] meridiem vel ab oriente
sunt [illegible] pro addendis vel subtrahendis in radicibus sunt [illegible]
[illegible] sequitur aliud

Ergo per predictas thabulas medii motus solis et lune aliquo die
cum medium motum lune scire volueris tunc cape
radicem lune [illegible] thabula radicum magna [illegible] cum
[illegible] pone [illegible] radicem [illegible] ad [illegible] gradus et minuta
adde ad signa [illegible] lune [illegible] aliquem diem [illegible] precedenti [illegible]
posita et quod [illegible] sunt provenit hoc pro medio motu lune in
meridie illius diei / Et si tunc ex additione minutorum ad
minuta 60 vel plura excreverint tunc pro 60 minutis adde unum gradum
gradibus precedentibus residuum servando [illegible] / Et si ex additione
graduum [illegible] 60 gradus vel plures excreverint tunc pro 60
gradibus adde unum signum signis precedentibus reliquum servando pro gradibus
Et si [illegible] vel plura excreverint / tunc abiectis [illegible] signis [illegible]
[illegible] servando [illegible] signis [illegible] / [illegible]
[illegible] [illegible] 30 gradibus [illegible] unum signum [illegible]
habebis [illegible] signa immediate precedenti / hoc [illegible]
[illegible] aliquo die [illegible] bisextili [illegible] bisextili
[illegible] est illius diei [illegible] immediate precedenti /

Item medium motum lune aliquo tempore post meridiem
invenire [illegible] quod dies [illegible] 60 partes [illegible]
minuta [illegible] / [illegible] minuta 30 [illegible] 6 horis 12 horis
et 20 [illegible] horis / 12 aut [illegible] horis [illegible]
[illegible] duabus horis [illegible]
[illegible] estimatum usque ad tempus [illegible] post meridiem [illegible]
[illegible] 30 vel [illegible] tunc [illegible]
[illegible] linea minutorum [illegible] diei [illegible] signa lune
que adde ad gradus meridiei [illegible] gradus lune illius
lunae et adde ad [illegible] meridiei / Et [illegible]
motus lune ad tempus [illegible] post meridiem / [illegible] plura sunt
minuta diei ad [illegible] 30 sunt plus [illegible] 30 [illegible]
[illegible] residuus minutis [illegible]
plus [illegible] capiendo lineatim illius minutis residuis [illegible]
et signa [illegible] linea ducta et adde ad [illegible]
[illegible] linea ductas adde [illegible]

Et patebit tibi medium motus lune ad tantum tempus quantum post meridiem. Hec pro hoc notando quod si plura minuta fuerint quam 60 reiciantur et pro 60 minutis ponatur unus gradus et pro 30 gradibus unum signum et ab 12 signa similiter procedas ut dictum est prius. / De sole

Ut medium motum solis aliquo die alicuius anni scire volueris intra cum radice solis in presenti tabula radicis et anno incarnationis pone signa radicis que ad signa gradus et minuta adde 8 gradus 3 et 4 solis in presenti tabula. Et patet medius motus solis in meridie illius diei, considerando quod datas annorum poteris scilicet 24 quod quando venerit sumpto tibi per locum suppositi ut hic de diei precedentis signum capiendo pro 60 minutis unum gradum et pro 60 gradibus unum signum prosequendo et abiciendo 12 signa quotiens potes et replendo signum per se capiendo et per 30 gradibus unum signum que ut patet precedenti tabula. / De quantitate media

Habitis igitur motibus solis et lune computatorum medium contrarium suppositum patet conveniens medium motum solis et lune in aliquo die Januarii vel alterius mensis in quo ipsa contrarias in eodem signo et simile motus eorum et si conveniens ipsa in eodem signo gradu et minuto ut quarta parte in meridie illius diei ad quem spatium et si aut si constituti signis gradibus et minutis sit quam ad alium diem in quo sit in eodem signo et ad maiorem differentiam a 12 gradibus et si subtrahe motum lune a motu solis et quod sit remanet in gradibus et minutis vocatur distantia / cum ista cum istorum gradum distantie duplica et cum illos gradum distantie que est prima linea rubea signo in tabula pro quo invenies horas et minuta illis gradibus distantie correspondentes et minuta horarum adde ad quantum plus duplicata fuerit et si adiunctis et minuta vel plura comprehendit pro 60 minutis adde unam horam horis premissis et residuum minutorum supra positis horarum et sic erit hec hora et minuta. Ascendit tempus medie quantitatis horas incipiendo sine computando a meridie diei ultra conventione. Si vero ante motum solis a motu lune subtraxeris ergo ex gradibus et minutis distantie ut prius dictum est ipsa [illegible] dant tot horas et minutas quantum media meridiem illius diei ante cessit / Capitulum aliud

Dubitas si prima coniunctio anni sciens alias coniunctiones sequentes eiusdem anni cum etiam prima potest invenire posses sic levius alias coniunctiones comperire. Si potes convenire adde igitur dies horas et minuta. Unde scias alias coniunctiones ex tabula posita addere horas et minuta prime coniunctionis anni et tunc habebis coniunctionem illius mensis cuius dies horas et minuta requisisti. Nunc coniunctio cum regula non est quod cuiuslibet mensis ut scias [illegible] sed ut [illegible] convenit lunatio [illegible] [illegible] si minuta ad minuta addideris et 60 vel plura excreverint tunc pro 60 minutis una hora hora est ingerenda. Similiter si horas ad horas addideris et 24 hoc est plures excreverint tunc pro eis addatur unus dies diebus residuum servando [illegible] et si anus bisextilis semper [illegible] [illegible] sunt duos unius decembris imponendo etc.

Cum computes tabulam coniunctionem primam sequentis anni si potes invenire adde igitur si annus sit communis vel embolismalis. Si communis tunc dies horas et minuta ita penultimam mensis [illegible] embolismalis posita adde ad dies horas et minuta prime coniunctionis et habebis coniunctionem primam sequentis anni. Si vero annus tuus fuerit embolismalis tunc dies horas et minuta ita ultimi mensis posita adde ad dies horas et minuta prime coniunctionis et habebis coniunctionem primam anni sequentis. Annus autem sit communis vel embolismalis [illegible] anni [illegible] [illegible] tabulam [illegible] 10 13 16 [illegible] [illegible] [illegible] [illegible] hora noscitur [illegible] etc.

Cum una coniunctio ex alia potest ita inveniri scilicet addendo 29 dies 12 horas et 44 minuta. Et si 60 minuta excreverint pro eis capiatur una hora et pro 24 horis addatur unus dies diebus [illegible] et [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] invenies unam coniunctionem ex alia quod tibi placebit etc.

Si oppositionem vel medium scire volueris addere coniunctioni adde 14 dies et ad horas eius 18 horas et [illegible] ad minuta eius adde 22 minuta et patebit tibi oppositio media. Item si ad coniunctionem [illegible] dies 7 dies 9 horas et 11 minuta addideris patebit tibi quadratura prima. Et si ad horas [illegible] addideris patebit tibi quadratura secunda etc.

Et ad noviluni [illegible] meridiem si computatur. Item si fuerit 0 [illegible] novilunii tunc [illegible] [illegible] [illegible] meridie [illegible] dici [illegible] fuit 1 [illegible] novilunii tunc [illegible] fuit hora prima post meridiem si 2 tunc secunda hora [illegible] tunc tertia. Si vero [illegible] fuerit hoc novilunium quod [illegible] addere ad horas meridiei et [illegible]

computato quod constat 24 tunc deponas 24 residuum computari debet ab hora noctis diuidentis sequentis et ubi finitur numerus computacionis ibi habebitur coniunccio scilicet in nocte vel die sequenti in media
Anno domini 1412 oriente fuit a nativitate uno et in quota hora sit coniunccio. Si venerit septem pauca minuta quod et illam subtraham et 22 horis nonilium cum 16 minutis et 10 horis ut uniuersum dici custodi dici in eadem linea quod sit 10 horis nouilunii 0 esset coniunccio fortis perfecta in medio custodi dici scilicet 18 hora. Si autem hora nouilunii ubi inuenta fuit 19 horis. Si fuit vicesima. Si 7 fuit vicesima septima. Si 9 fuit vicesima nona. Si 6 fuit vicesima quarta. Si 6 fuit vicesima sexta. Si 9 et ultra quod excedit per duos habens 24 constat 24 horis 24 remanebit unitas quod esset horis prima noctis sequentis et fuit coniunccio eadem prima hora noctis immediate. Si 8 fuit secunda horis noctis custodi. Si 9 fuit tercia. Et si eadem die venerit 22 horis nouilunii horas videlicet 22 computando cum 18 et ab horis medii custodi dici veniet coniunccio 16 horis et 10 minutis dici immediate subsequentis

Primum ergo capitulum in-
tendit de generatione embrionis
in ventre materno et de ipsius [illegible]
nam et plura videntur in epistola
que apud [illegible] scripta

Post quam autem iam in tractatibus
premissus est de hiis que
in tractatibus audiuntur, ita scilicet in [illegible]
corporis ostendere et primo de generatione
embrionis videlicet primo quod nondum
et diligenter notare [illegible]
[illegible] omnis [illegible] quia [illegible]
ine patre et menstruo ma-
tris secundum sententias philosophorum et me-
dicorum. Secundum Aristotilem non potest
semine patris in substantiam fetus
cedere. Secundum Galenum [illegible] fetus [illegible]
procedit, et [illegible] pro [illegible]
possibile [illegible] Medici di-
cunt totum semine tam ex parte
matris [illegible] et ex par-
te [illegible] menstrua dicunt ce-
dere in substantiam fetus. Iste [illegible]
[illegible] accepta una parte secundum
Aristotilem vel medicorum [illegible]
est quod [illegible] recipiat ista
[illegible] in [illegible] [illegible] Sic co-
[illegible] menstrua
quo [illegible] Et quod ista
[illegible] in vulva [illegible]
[illegible]
Recipe autem ista [illegible] in
[illegible] loco [illegible]
[illegible] Post
quam [illegible] recepta sunt
[illegible] claudit [illegible]
ita quod [illegible] recipi possit

[illegible] et [illegible] sic videtur
quod sunt clausa. Et est [illegible]
[illegible] menstruorum in mulieribus [illegible]
quod nondum est [illegible] menstrua in mulie-
re nichil aliud est quam superfluum
alimentum quod in substantiam [illegible]
non cedit. Et est [illegible]
quod menstrua in mulieribus superfluunt
quolibet mense semel ad minus
et hoc cum mulieres sunt tales etatis
hoc est xiiii annorum ut frequenter
accidit. Iste fluxus menstruorum de
quolibet mense [illegible]
[illegible] in aliquibus accidit
iste fluxus in novilunio [illegible]
[illegible]
[illegible] multis
in differentiis [illegible] maxime
sunt [illegible] aut minus [illegible]
[illegible] fluunt
[illegible]
[illegible] complexion-
nis [illegible] De hiis que
dicta sunt omnia [illegible] dubia
[illegible] dubium est utrum iste
fluxus fiat propter calorem sanguinis
aut propter aliquid aliud [illegible]
quod nondum quod in omnibus [illegible]
in corruptione calor menstruorum
sanguineum est ut in pluribus
et [illegible]
[illegible] malis et viciosis [illegible]
[illegible] in hiis vero sunt semper
menstrua viridi colore [illegible]
loquor de corruptione [illegible]
[illegible] in corpus
sunt si debite etatis fuerint [illegible]
[illegible] menstrua et [illegible] abstrahat
pars, scilicet quando menstrua [illegible]
[illegible] et hoc [illegible]
[illegible]
ad quod [illegible] est [illegible] quod [illegible]

fluunt in specie eorum sanguinis &
termini. Tertio dubitatur quare
mulieribus menstrua fluunt. Dicendum quod
sunt superfluitates alimenti et in
ultimo formata que in se superflua
alimenta cum quod mulier humida
et frigida est naturaliter. Unde sicut
calidus est quoniam humidi est
fluxus et dicitur in isto meteororum et ali-
bi et maxime humiditas est aque
non quod est in naribus in ultimo secundo
humidum est et cum illud est artum et
non est calor semper agat in humi-
dum quidam calor naturalis et cum
non sit frustra nec dicitur ponere
tot et nimio semper melius
et quod est calor in mulieribus debilis
est respectu quod est in viris ad tot
alimentum in mulieribus non possit
convertere facit quod melius est primo
que naturaliter erratur et secundum reliquum
quod mittit ad locum in quo
fluunt menstrua in muliere. De isto
autem in tertio de vegetabilibus quod maior
est in complexione quam plus exposuit
negotium. Quarto dubitatur a-
liquis unde veniat menstruum
in muliere quod est in coitu viro
et semper dicendum est quod quando mulier
concepit retenta sunt menstrua quod
si retenta sunt nimium sed vir
fluat in coitum dicendum quod quando
concepit retenta sunt menstrua propter hoc
similiter tamen ut de menstruo nutri-
tur fetus in ventre mulieris. Possunt
tamen currere et mulier in coitu
est et vis propter nimia delectacionem
quam habet propter hoc quod bene et bonum
in vulva coniunctis propter ligamen-
tum virilem quae frangant menstrua
mittit et hec est naturalis ratio cur
tunc est et quod violentia fluxus
talis menstruorum. Sed omnia dicta
de mulieribus supradicta sunt magis que
apta est ad comprehendendum in coitu
sed istis solum intendo dubitando quare
iste in pregnante maxime ap-
petit coitum et cetera istius modi quando
deinde vulva mulieris calescit et cetera

diversas agentia in textu com-
menti in 7° metheororum est intel-
lectu quod eadem animalia alterum
eadem specie idem est sic pos-
sunt fieri ex semine et sine
semine. Sicut enim famulas quod
quod sic ab arte quoque aurum sed in
hoc differt ab alkimica aut oppo-
situm voluit in differentibus modis
ut visum est differt tamen ab
eo secundum eius doctrinam. Primo
metheororum distinctione ibi ubi
quod nam impossibile est. Ca-
pitulo quod pagina. Tunc prout
ista distinctione fit de constellatione
humiditatis. Si constellatio hu-
mectatus recipiat hic una
parte eius alia opposita recipi-
tur aliqua parte, scilicet constellatio dispersus
et quadrato dual humiditatis. In
una parte eo generantur et ea humi-
di et alia dispersans in alia par-
te impossibile est de amicu-
ta determinavimus. Item di-
camus quod animalia quaedam sine
semine generantur redditur apparet
per hoc. Ratio materie illius est
quod calor dissolvens mixtum
corporis per hoc [struck through] quod sub-
tile corporis extrahitur et relinquitur
grossum et naturalis et non est calor
ab arte. Ut de aliis in textu com-
menti est quod in materia corrupta animal
sine semine nascitur est aliquid
humiditatis vitale in quo est
quaedam humiditate calor naturalis
agit corporis et quamvis aut dicta
segregat agilabiz partes grossi et
terrestris. Et est intelligendum sicut
primo huius metheororum est

habet quaedam est quanta pallet se-
aliter. Et non formaliter sed distinguitur
ut dubitacio et obiectio. Quod
toca id sit quamvis palet quod
id dicit quod omne quod agit est
unitas et eadem specie unum est vir-
tualiter vel formaliter. Est ita.
Nondum etiam istud quod ex eadem
materia aliquod plura animalia
putrefacta nascuntur sic ex corpore
pluria inter alia etiam consimilia
et aliquando generantur ex eadem materia
animalia diverse speciei diversi coloris
et diverse figure. Ita aut diversitas
istorum animalium est diverso semine
in matrice. Talis tamen concipit
in animalibus perfectis et est in-
telligendum quod in matrice mulieris
plures sunt in cellulis quaedam
eo semine est de causa apparet colligi-
tur quod in una quaque cellula matri-
cis semine recipitur et est motus
generationis plurimus semine et
iste motus generationis et na-
tura in putrefacta accipit simi-
litudinem causae et ideo est aliqui
loco minus et aliquando loco
seminis et quod fit calidus humidi-
tas ut dictum est quod dicitur
calidus humiditas per locos educatis
eius putrefacto et ideo multiplicantur
talia animalia et ea similis horum
animalium est similitudo humidi educti
de corpore. Et hic est quaedam eius qui
aut quaedam sunt longa et stricta
quaedam arta et brevia etc. Hoc
est ad compositionem humidi quia ex
colorem calido secundo quamvis animal
longum fit et strictum quod calor multum
extendit in illo inflammatio
aut frigido aut humido quamvis
animal latum et breve per humorem

aquemus nelon est quantitas et
frigiditas non nullum extendit
ipsum melancolico naturali quantitatem
animal strictum vel breve quia frigidi
tas non permittit ipsum extendi
et siccitas non permittit ipsum
dilatari et longum vel melancolico
autem actuali que adusta est
quantitatem animal valde longum et
gracile et fervor caloris eius
multum extendit siccitas non
deviata et terminat. Et eundem
quod colorem vel citrinum colorem in
frequentius. Sanguineus est rubeus
et flegmaticus est albus vel melan
colicus albus vel niger et quod
non sunt commixta ... et equa
litas et calor ... commix
ta erunt. Sic ergo in hoc capi
tulo non quantitatis animalium
imperfectorum et qui plures flexi

longa vel aliqua brevia est et sic de
aliis. Hec autem dicta sunt ne quod
de ipsis sciamus. Aliorum perfecto

Secunda ut signa conceptionis in
muliere que sunt plura. Primum
signum est apud eam quamquam
mulier est intacta. Si vero mulier
post coitum sentiat frigus et do-
lorem in renibus signum est
quod concepit. Item si parvus fluxus
seminis dimittitur signum est.
Item si vir coitus in coitu
senciat vulvam virile sugi
et attrahi causam esse ... quod
sit corpore vulve et si menstrua
non currunt. Si mulier pallida
et turbata est in oculis materia do-
lor est in renibus idem signum.
Item aliud signum si aliqua
non concupiscat coitum hoc
aut et in quibusdam vero. In quibusdam
vero mulieribus quando sit tarde
est magis concupiscit qua con-
cipit vel visio super in quesitione
quidam. Item si color faciei ...
mulier pallida mutatur est. Item
si aliena cibaria concupiscat

ut vero poma aut [illegible] et de aliis. Hoc autem sunt signa conceptionis masculi vel femelle.

Sed signa utrum sit in

[illegible] vero sit hec: color faciei rubeus, motus levis, venter dextra parte tumescit et rotundatur. Lac eius est spissum et bene digestum ita quod super aliquod politum et equale posita non dividitur. Si pro pectus crescebant et non fluunt. Item si lac mamillarum est super urinam mulieris fusum petat fundum perpendiculariter. Item recipe de fonte clarissimo et mundo et unam guttam sanguinis cum de lacte dextro et infunde guttam illam aque illi et si sanguis fundum petit masculi signum est. Si vero supernatat autem signum est femelle. Item si dextra mamilla habeat grossiorem signum est masculi et e contrario est iudicandum.

Hec autem sunt ad

masculum contraria sunt generaliter. Quia facies grossa et est [illegible] tarda et pallida et venter eius est oblongus in sinistra parte et mamilla sinistra turgescit et lac eius magis indigestum vel lividum et aqueum et fusum super pallidum et [illegible]. Si [illegible] et defluet et super urinam fusum natat vel in aqua tepida et de aliis. Item si dolor in sinistra parte semper est femina sicut in dextra masculus est ut supra.

Signa autem ut scias si

Si mulier concepit an non. Hoc est credendum id quod dicitur. Volens des ei mellicratum bibere cum vadat dormitum et si senserit quod [illegible] circa umbilicum [illegible] capitis vel dolorem cordis vel alius dolor ex quo sequitur [illegible] [illegible] si facias de concepit nec abortiendo non sentiat [illegible] [illegible] quam sic facias. Recipe [illegible] [illegible] liquide et commisce cum aqua tepida quantum sufficit et des ei ita vero si fuerit [illegible] aliqua non concipiat. Item appone naribus [illegible] [illegible] et [illegible]. Si concepit illo adorat. Si autem adorat signum est quod non concepit. Item recipe [illegible] pone in planta pedis mulieris [illegible] et dimitte ibi per spacium aliquod. Si tenuit colorem suum non concepit. Si vero colorem mutaverit signum concepit.

Item nota quod si mulier

Si mulier impregnata senciat aliquam torsionem circa umbilicum et hoc in fine quarti mensis signum sunt medici quod pariet in vii mense. Si autem senciat in fine quarti mensis signum est quod in octavo mense pariet et [illegible] [illegible] valde [illegible] mulier impregnata [illegible] [illegible].

Est autem notandum et diligenter memorie commendandum quod mulieres antique quibus menstrua sunt et que fluunt ad hoc vel respiciunt pueros et fluxus menstruus lactentes inficiunt eos sicut dicit Albertus in tractatu suo de menstruis mulierum. Causa autem huius est quod in primo reddit causam de particularibus fluxibus. Idem de aliis que non fluunt. Hec idem quibus fluunt menstrua quia est fluxus per totum corpus movetur primitus in fluunt aere quia illa materia primo vadit ad oculos et inficit eos propter subtilitatem et porositatem oculorum. Oculi enim infecti inficiunt aerem. Aer autem infectus inficit pueros. Et inde est quod ... et illud est de infectione pueri. Hoc de speculo et visibili eo vel quare antique mulieres que non fluunt menstrua inficiunt pueros. Hoc non est quia retinent abundantiam malorum humorum et corruptorum et venenosorum et quia antique mulieres sunt deficit in eis calor naturalis naturaliter et digerens eorum materiam. Et ideo iste mulieres precipue si pauperes fuerint quia vescuntur grosso nutrimento [illegible] quod operatur ad eorum materiam infectionem quam plus sunt [illegible] et plus et eodem modo de alie inficiunt pueri in ... inficit. Et iste sepius inficit quam alie que adhuc fluunt menstrua quia iste fluxus est ad eorum purgationem.

Sicut dicit philozophus

Secundo physicorum primo in natura sit materie
eius quidem. Et hic ad prius
negocii manifestationem in quadam
nunc capitulo multum valet. Notandum
quod menstruosa periculosa in natu-
ram nocumenti. Illa in dimidia alia
alias species que cum aliqua parte
corporis corpora quamvis essent illius
specie nature excedunt. Sed ex-
cedentes videntur in hominibus non
habentibus nisi vnum pedem
vel vnam manum vel aliquod
simile. Quod non quilibet intel-
ligunt. Et philosophi monstra appellant
nature accidentia. Duplici modo sunt
enim condimentum nature. Aut ex
habundantia. Condimentum quoniam
diminuto matrice attribuitur
totaliter vere. Et circa monstra
principalia primo debent consi-
derari et formari ita enim fugaxp [illegible]

et in concavo sunt sicut ut appro-
batus est ad eam que sunt princi-
palia forte consistit dispositio et
formatio et ad formationem ceterorum
membrorum studet et ibi quoniam ma-
teria quandoque est forte et fiat quod
pes et forte propter diminutionem
quantitatis diminuto est in materia
et ipsius coniungitur caput cum in-
anis vel minus quod natura requi-
rit aliquid illius in dividendum
particulis secundum quantitatem et loquor
de individuo talis quantitatis
et ideo si diminuto in materia
precedente formatio non suffi-
cit sed caput vult formatio secundum
diminutam materiam proportionale
esse natura in dividendum ipse et in
omnibus membris et ideo in aliis
principalibus concludi potest eadem
istis principibus est ordo ut
philosophi naturales et medici testantur.
Alio quidem modo diminutio materie
accidit alicui parti quantitatis specia-
liter quod nondum est et sic in plurimum
plurimum passibus et maxime in
degeneratione et corruptione quoniam
in maior quantitas corruptibilibus
corporibus consumitur esse in parte
et ideo quoniam natura ignis fuit in ma-
teria calidus in sinum simile et de
aliis et consistit taliter esse fuit.
obtinentur elementa formaliter esse
in mixto hoc enim est quod iste
cum philosophus in primo de generatione
ubi dicit quod elementaliter solum sunt
in elemento quod consistit est possibile
aliquid semine habere proportione di-
minutum propter alicuius specialis
elementi et etiam si propter tanto

diminuto sunt tamen ossa etiam ma-
teriabili formatur et de aliis.
Contingit enim aliquid diminui
corporis in dividendum quantitatem aliquid
in uno pede vel aliquid in uno
brachio et de aliis aliquid enim
in digito et in consimilibus et si-
ne corpora propter alicuius mon-
stra autem si super habundantie
monstra fiunt in natura et possibile
est in similibus propter quantitatem mate-
rie superfluitate accidit ut frequenter
in illis qui habent vi digitos
in manibus et vi in pedibus
vel duo capita vel aliquid tale.
Et sic intelligendum quod monstruo-
sitas non solum est propter diminutionem
materie sed nunc narrata est
ex aliquo accidente quod in aliqua ma-
teria que si lubrica vel maliciosa
vel viciosa fuerit tota semen non
retinetur sed diffugit aliquid vel
aliqua tota semen in massa
colligatur in ea procreatur et
sic in extendit et aliud habet quan-
tum monstruous specialis secundum quod plu-
rium quorum propter coitus accidit
et de aliis esse sufficienter longe re-
habere diminutum et quod coniungit
ipsi mox et eam colliget materiam
diminutam in matrice efficitur que
habet eam dispositionem [illegible]
[illegible] et adhuc [illegible] frequenter
multum cooperatur immoderatus
vel inordinatus coitus quando
aliquid primitus vel immoderatum
exercendi et modo vehementer
faciunt diminutionem in semine et
aliquid quedam in quibus de-
tinet in ordinatio coitus quoniam
eo quod esse [illegible] quod semellab

vno est contra. Et ipse masculus
in ordinatione iacet et femella sic
mense in natura. Narrat de quodam
eciam tempore coitus laudabiliter iacuit
super femellam generauit puerum in
vno latere eiusdem et in pede vno
claudum. Et causa huius est quia inor-
dinacione coitus processit. Alio ac-
cidente id potest naturale contingere propter habun-
dantiam que diminucione opponitur
et istud habet fieri multis modis
sicut causas particulares. Aliquando vero
propter habundantiam materie est propter
partem eius et propter eius contingenciam
nature et propter eius formacionem
apparet eius tortuositas in
membris. Et cum materia est
habundat in parte deputata natura
facit naturaliter et format aliquando
duo capita aliquando duos pe-
des quorum vnus multo maior
altero secundum in soluta natura illius
est et de aliis. Et de istis cuius
mirabilior est efficiens que
iteratur. Alio de vno quod cum generaretur
sunt duo membra libidinis
propter virum vnum et propter mulie-
rem ita quod poterat subcumbere et
incumbere. Causa vero huius origi-
nalis est propter habundanciam ma-
terie specialis cum tamen ibi materia
sufficiens sunt generari vtraque mem-
brorum propter superfluitatem talis partis
seminis in qua membra talia genera-
ri solent. Iteratur etiam aliquid quod sit
accidencia talia et realia. Con-
tingit sic et quadam specialia sic
narrat de duobus geminis
quorum vnus habebat virtutem
in dextro latere et vbicumque

portabatur clausa fuerit sera
aperte illius lateris applicabat
omnes sere et alius huic virtute
in sinistro latere. Et vbicumque por-
tabatur clause fuerunt aperte illius
lateris que prius aperte erant et
loquor de apericione et clausione
serarum in hostiis domorum atque
aliarum. Causa vero huius signis
accipiatur non ex materia. Et ex vir-
tute celi et speciali constellacione eius
et hec constellaciones raro contingunt
et non solum constellacionis hoc contin-
git. Et in speciali disposicione
materie ad hunc effectum. Et materia
actiuis actiuorum sunt in potentia
et disposito. Et de quo scio de arte
et nullus credat sine oportet
illud esse fictum. Quia illud assimi-
li contingit videri in lapidibus
quibusdam. In quos aliqua specia-
lia constellacio agens imprimit
formam hominis vel animalis vel alte-
rius speciei. Et secundum contingenciam agentes
et illud videmus in eius cum
lapides diuiduntur ut sepe
visum est agit. Et quia et sic
constellacio specialis et monstruositates
efficitur esse propter diminucionis
et propter habundancie. Et quia in omnes
alias speciales in monstruo possunt
reduci et hos duos generales
modos patet ex intentione auctoris
in suo sufficienciae sicut vero addit
diminucionem et excessum est opinio
... apud propter inobedienciam materie
et in sufficiencie. Et si aliquis
argueret contrarium accipiens ...
propter suis intentionem agentes ut supposuit
dicitur. Respondendum est aucto quod
non semper est possibile est propter partem

tione quod calor decoquens agit in
auro quod in argento operatur vero
calor in eo quod naturalis est habet
virtutem generativam eius cum quod
nature quamvis calor naturalis dicatur esse et
in eo est virtus celi et motorum celestium

illius nature quam format Sicut
dicitur Sic generat videre in calore

vero calor naturalis habet digerere humidi

educit humidum ipsum conformatum
nisi in quantum calor Sed in quantum
calor naturalis in eius digestione
accipitur quia in digestione illa humidum

ergo visis in talibus bene ad propositum

accedamus et dicamus quod sperma
nichil aliud est nisi superfluum
alimentum quod in substantia rei aliquando
non cedit Sed ex hiis que dicta
sunt manifeste apparet et si
differencia spermatis sit in nota
nota que prius aliqualiter erat
ignota quod ergo vero tamen digestio
recipitur in 3a digestione et
non totum cedit unde per diaphragma
respirationem mittitur in calore
sanguinis subtilis et clari et
vasa genitalia et venit testi
culorum fructificationem et dealbatur et
ideo videtur albi coloris propter calido
rem decoctionem quam recipit in testi
culorum Habet istud tamen sperma
emissum nimio desiccat corpus
quia venit humiditate et calo
ris calidi habet corpus aut desicca

femellis brevioris vite sunt
et subdit est enim generaliter verum
eorum masculum femellis sit longi

Sic ergo de intencione philosophi patet

~~Primus liber metaphysice~~

Omnes homines natura scire desi-
derant. Sensus visus multas
nobis differentias rerum demonstrat.
Homo qui arte et rationibus
vivunt alia aut animalia fantasi-
a. Sic pertractans. Aut sapientia
fecit arte et experientia casuum.
Experientia est cognitio singularium
[illegible] vero universalium. Actiones et omnes
operationes sunt circa singula. Quia
medicus non sanat hominem in
quantum homo sed sanat Sortem et Socra-
tem aliquid particulare homo et de aliis.
Architectores sunt sapientiores et
architectores. Sed non manuale ar-
tificem. Signum scientis est posse
docere. Sensuum est quelibet
arte in homine videtur invenit
primum ab omnibus ad mirabilia non
solum aliquem in beneficio utili-
tate. Sed cum quia sapientis
et ab aliis differentis. Sed certus
sunt quorum sunt ad opus. Ad
sapientiam pertinet scire omnia
in universali et scire difficilia et

certe scientiam docere aliis causas
reddere eorum qui scit et que scien-
tiarum sui ipsius tamen est
et non eorum alterius et que
scias cum ordinetur aliis
sunt sunt scires. Sapientis est regere
et non regi. Hii soli docent
qui causas de singulis dant et maxime
universalia sunt valde difficilia. Sunt
omnibus ad cognoscendum quia
remotissima sunt a sensibus
et summe universalia sunt et valde
est opus in omni uti. Sapientia
mathematica non est sciam practica
sed speculativa. Propter utilitatem vero
est. Sed propter fugam ignorantie
propter admirari homines primo in-
ceperunt philosophari. Philosophus
et ideo quidem amator fabularum et
aliqualiter philosophi. Sed cum fabula com-
ponitur et mirum construi dicitur
philosophi. Antiquus autem homines
habebant incipere philosophari quia
dubitantes ad mirari ignorantem.
Et hic liber dicitur qui sui ipsius

Anima est actus primus organici
corporis physici in potentia uitam habentis

Anima est forma id est vita formalis corporis. Ideo oportet querere utrum anima et corpus fiat unum. Solutio: sic. Si enim oculus esset animal, tunc visus utique esset eius anima. Animatum differt ab inanimato in vivendo. Vivere dicitur multis modis, scilicet sentire, intelligere et moveri secundum locum. Sed alicui istorum inest aliquid dicitur vivere. Anima movet corpus quia omnis differentia positionis, scilicet sursum, deorsum, ante, retro, sinistrorsum, dextrorsum, retrorsum, alteratio et augmentatio. Anima est principium quo primo et per se scilicet vivimus, sentimus, intelligimus et secundum locum movemur. Item potentie anime principales: vegetativa, sensitiva, intellectiva, secundum locum motiva. Hoc se habet ad invicem quod vegetativa est sine sensitiva ut in plantis et non econverso. Et sensitiva sine motiva ~~potest esse sine intellectiva~~ secundum locum ut patet in animalibus gressibilibus et non econverso. Et sensitiva que secundum locum motiva potest esse sine intellectiva ut patet in brutis et non econverso ut patet in mortalibus. Item in plantis est vita anima in actu, vite vero in potentia et [illegible] partes earum ab [illegible] vivere. Item intellectus separatur ab aliis potentiis anime tamquam perpetuum a corruptibili. Separatur enim tamquam perpetuum a corruptibili. In brutis non potest sine sensitiva. Item anima et non potest sanari sanitate. Et corpus. Unde potentie animales non possunt dependere ab

forma. Item anima per se tamquam materia qua est forma quia actus determinatorum est in passo disposito sicut forma in recipiente. Et negativa potentia in sensitiva et sensitiva in intellectiva potentia continetur. Item tactus et actus vegetative necessarii sunt in omnibus viventibus quorum perfecta sunt et non orbata. Et que generatio eorum non sunt spontanea generale scilicet simpliciter ut dicit de omnibus. Item in mortali participent secundum quod possunt et nichil dicitur corpus per unum. Vel quia movet per eius motum unum in specie. Item quomodo anima est causa corporis naturalis formalis et efficiens. Item duplex est finis scilicet finis cuius et finis quo. Sed finis cuius et finis quo. Item nichil potest et naturaliter [illegible] nisi quod habet vitam. Item vires potentie anime vegetativa et nutritiva, augmentativa, generativa. Item radices in plantis sunt similes ori in animalibus. Item suscipit nutrimentum. Ignis augetur in infinitum quamquam sunt consistentia omnium naturalium constantium terminus et ratio magnitudinis et augmentationi alimentum. Anima dicitur conservativa generative et diffinitive. Item quia [illegible] omnis est scilicet et omne vivens quod vivunt indiget nutrimento scilicet conservat agens et patiens in principio. Item sunt difficilia in fine vel scilicet sunt

In aliis animalibus color pilorum
est secundum colorem cutis. In homine
vero non est quia quidam homines
habent corium valde album
et pilos nigros. Causa illius est
quia cutis hominis est valde te-
nuis respectu aliorum animalium et ideo
non mutat materiam pilorum. Talia
animalia comedentes multas

Multa animalia propter similitudinem

oculus profundus videt bene

in sentiendo remote; in distin-
guendo differentias sensibilium illorum lon-

bene pubes plus delectantur

et quanto plus consuescunt

in frigidis animalia cerebrum est
magis frigidum quam totum corpus
et hec dicta sufficiant.
